

# Using Uni-Pits prevents mosquitoes breeding.

## The Inline Drainage System.

Uni-Pit™ is designed to fit directly into the stormwater line with PVC glue. Traditional pits require large scale excavation, then cutting and fixing the storm water line into both sides of the pit. A riser is not required as a 90mm PVC pipe can be cut to the required height. (150mm PVC pipe for the 450).

Unique VORTEX\*  
design clears water  
faster.

Built in Anti-Tamper  
feature.
