Frequently Asked Questions

Q1. Do you have a range of fittings?
A. RELN has a range of Stretch Ag-Pipe fittings including downpipe adapters, couplings, end caps and tee pieces. See product guide to find the right product for your project.

Q2. Can I reuse my stretch Ag-pipe off cuts?
A. Yes. With our Stretch Ag-Pipe Coupling, you can reconnect the off cuts back into the Stretch Ag-Pipe channel.

Q3. Will Stretch Ag-Pipe attach to other RELN Surfacewater channels?
A. Yes. With our Drainage Channel Coupling you can connect Stretch Ag-Pipe to RELN Surfacewater channels.

Q4. Can the Stretch Ag-Pipe Downpipe Adapter connect to rectangular and round downpipe?
A. Yes. It comes designed for a rectangular downpipe to connect to a round downpipe cut the rectangular mould off, leaving you with a round connection.

Q5. What is the difference between solid and slotted with sock Stretch Ag-Pipe?
A. **Solid** is enclosed, which is ideal for diverting water from one point to another.
Slotted with Sock has closely spaced slits, which allows water ingress or disposal, covered by Polyester sock. The sock prevents clogging of the slots. This is ideal for groundwater drainage such as controlled flow of water into the ground or French drains.
